

years at a time, dependent on whether the SSC provides single or multiple-year ABC recommendations.

(b) *Performance review.* The Black Sea Bass Monitoring Committee shall conduct a detailed review of fishery performance relative to ACTs in conjunction with any ACL performance review, as outlined in § 648.140(b)(1)–(3).

[76 FR 60636, Sept. 29, 2011]

**§ 648.142 Black sea bass specifications.**

(a) *Commercial quota, recreational landing limit, research set-aside, and other specification measures.* The Black Sea Bass Monitoring Committee will recommend to the Demersal Species Committee of the MAFMC and the ASMFC, through the specification process, for use in conjunction with the ACL and ACT, sector-specific research set-asides, estimates of the sector-related discards, a recreational harvest limit, a commercial quota, along with other measures, as needed, that are projected to ensure the sector-specific ACL for an upcoming year or years will not be exceeded. The following measures are to be consisted by the Black Sea Bass Monitoring Committee:

- (1) Research quota set from a range of 0 to 3 percent of the maximum allowed.
- (2) A commercial quota, allocated annually.
- (3) A commercial possession limit for all moratorium vessels, with the provision that these quantities be the maximum allowed to be landed within a 24-hour period (calendar day).
- (4) Commercial minimum fish size.
- (5) Minimum mesh size in the codend or throughout the net and the catch threshold that will require compliance with the minimum mesh requirement.
- (6) Escape vent size.
- (7) A recreational possession limit set after the reduction for research quota.
- (8) Recreational minimum fish size.
- (9) Recreational season.
- (10) Restrictions on gear other than otter trawls and pots or traps.
- (11) Total allowable landings on an annual basis for a period not to exceed 3 years.
- (12) [Reserved]
- (13) Modification of the existing AM measures and ACT control rules uti-

lized by the Black Sea Bass Monitoring Committee.

(b) *Specification fishing measures.* The Demersal Species Committee shall review the recommendations of the Black Sea Bass Monitoring Committee. Based on these recommendations and any public comment, the Demersal Species Committee shall make its recommendations to the MAFMC with respect to the measures necessary to assure that the ACLs are not exceeded. The MAFMC shall review these recommendations and, based on the recommendations and public comment, make recommendations to the Regional Administrator with respect to the measures necessary to assure that sector ACLs are not exceeded. Included in the recommendation will be supporting documents, as appropriate, concerning the environmental and economic impacts of the final rule. The Regional Administrator will review these recommendations and any recommendations of the ASMFC. After such review, the Regional Administrator will publish a proposed rule in the FEDERAL REGISTER to implement a commercial quota, a recreational harvest limit, and additional management measures for the commercial fishery. If the Regional Administrator determines that additional recreational measures are necessary to assure that the recreational sector ACL is not exceeded, he or she will publish a proposed rule in the FEDERAL REGISTER to implement additional management measures for the recreational fishery. After considering public comment, the Regional Administrator will publish a final rule in the FEDERAL REGISTER to implement the measures necessary to ensure that recreational sector ACL is not exceeded.

(c) *Distribution of annual commercial quota.* The black sea bass commercial quota will be allocated on a coastwide basis.

(d) *Research quota.* See § 648.21(g).

[76 FR 60636, Sept. 29, 2011, as amended at 76 FR 81850, Dec. 29, 2011]

**§ 648.143 Black sea bass Accountability Measures.**

(a) *Commercial sector fishery closure.* The Regional Administrator will monitor the harvest of commercial quota

based on dealer reports, state data, and other available information. All black sea bass landed for sale in the states from North Carolina through Maine by a vessel with a moratorium permit issued under § 648.4(a)(7) shall be applied against the commercial annual coastwide quota, regardless of where the black sea bass were harvested. All black sea bass harvested north of 35°15.3' N. lat., and landed for sale in the states from North Carolina through Maine by any vessel without a moratorium permit and fishing exclusively in state waters, will be counted against the quota by the state in which it is landed, pursuant to the FMP for the black sea bass fishery adopted by the ASMFC. The Regional Administrator will determine the date on which the annual coastwide quota will have been harvested; beginning on that date and through the end of the calendar year, the EEZ north of 35°15.3' N. lat. will be closed to the possession of black sea bass. The Regional Administrator will publish notification in the FEDERAL REGISTER advising that, upon, and after, that date, no vessel may possess black sea bass in the EEZ north of 35°15.3' N. lat. during a closure, nor may vessels issued a moratorium permit land black sea bass during the closure. Individual states will have the responsibility to close their ports to landings of black sea bass during a closure, pursuant to the FMP for the black sea bass fishery adopted by the ASMFC.

(1) *Commercial ACL overage evaluation.* The commercial sector ACL will be evaluated based on a single-year examination of total catch (landings and dead discards). Both landings and dead discards will be evaluated in determining if the commercial sector ACL has been exceeded.

(2) *Commercial landings overage repayment.* Landings in excess of the annual coastwide quota will be deducted from the quota allocation for the following year in the final rule that establishes the annual quota. The overage deduction will be based on landings for the current year through September 30, and landings for the previous calendar year were not included when the overage deduction was made in the final rule that established the annual

coastwide quota for the current year. If the Regional Administrator determines during the fishing year that any part of an overage deduction was based on erroneous landings data that were in excess of actual landings for the period concerned, he/she will restore the overage that was deducted in error to the appropriate quota allocation. The Regional Administrator will publish notification in the FEDERAL REGISTER announcing the restoration.

(b) *Recreational landings sector closure.* The Regional Administrator will monitor recreational landings based on the best available data and shall determine if the recreational harvest limit has been met or exceeded. The determination will be based on observed landings and will not utilize projections of future landings. At such time that the available data indicate that the recreational harvest limit has been met or exceeded, the Regional Administrator shall publish notification in the FEDERAL REGISTER advising that, effective on a specific date, the black sea bass recreational fishery in the EEZ shall be closed for remainder of the calendar year.

(1) *Recreational ACL overage evaluation.* The recreational sector ACL will be evaluated based on a 3-year moving average comparison of total catch (landings and dead discards). Both landings and dead discards will be evaluated in determining if the 3-year average recreational sector ACL has been exceeded. The 3-year moving average will be phased in over the first 3 years, beginning with 2012: Total recreational total catch from 2012 will be compared to the 2012 recreational sector ACL; the average total catch from both 2012 and 2013 will be compared to the average of the 2012 and 2013 recreational sector ACLs; the average total catch from 2012, 2013, and 2014 will be compared to the average of the 2012, 2013, and 2014 recreational sector ACLs and, for all subsequent years, the preceding 3-year average recreational total catch will be compared to the preceding 3-year average recreational sector ACL.

(2) *Recreational landing overage repayment.* If available data indicate that the recreational sector ACL has been exceeded and the landings have exceeded the recreational harvest limit, the

exact amount of the landings overage (in pounds) will be deducted, as soon as possible, from a subsequent single fishing year recreational sector ACT.

(c) *Non-landing accountability measures, by sector.* In the event that a sector ACL has been exceeded and the overage has not been accommodated through landings-based AMs, then the exact amount of the overage in pounds by which the sector ACL was exceeded will be deducted, as soon as possible, from a subsequent single fishing year applicable sector ACL.

(d) *State/Federal disconnect AM.* If the total catch, allowable landings, commercial quotas, and/or recreational harvest limit measures adopted by the ASMFC Black Sea Bass Management Board and the MAFMC differ for a given fishing year, administrative action will be taken as soon as is practicable to revisit the respective recommendations of the two groups. The intent of this action shall be to achieve alignment through consistent state and Federal measures so no differential effects occur to Federal permit holders.

[76 FR 60636, Sept. 29, 2011]

**§ 648.144 Black sea bass gear restrictions.**

(a) *Trawl gear restrictions*—(1) *General.*

(i) Otter trawlers whose owners are issued a black sea bass moratorium permit and that land or possess 500 lb (226.8 kg) or more of black sea bass from January 1 through March 31, or 100 lb (45.4 kg) or more of black sea bass from April 1 through December 31, must fish with nets that have a minimum mesh size of 4.5-inch (11.43-cm) diamond mesh applied throughout the codend for at least 75 continuous meshes forward of the terminus of the net, or for codends with less than 75 meshes, the entire net must have a minimum mesh size of 4.5-inch (11.43-cm) diamond mesh throughout.

(ii) Mesh sizes shall be measured pursuant to the procedure specified in § 648.104(a)(2).

(2) *Net modifications.* No vessel subject to this part shall use any device, gear, or material, including, but not limited to, nets, net strengtheners, ropes, lines, or chafing gear, on the top of the regulated portion of a trawl net except that one splitting strap and one bull

rope (if present) consisting of line or rope no more than 3 inches (7.6 cm) in diameter may be used if such splitting strap and/or bull rope does not constrict, in any manner, the top of the regulated portion of the net, and one rope no greater than 0.75 inches (1.9 cm) in diameter extending the length of the net from the belly to the terminus of the codend along the top, bottom, and each side of the net. “Top of the regulated portion of the net” means the 50 percent of the entire regulated portion of the net that (in a hypothetical situation) will not be in contact with the ocean bottom during a tow if the regulated portion of the net were laid flat on the ocean floor. For the purpose of this paragraph, head ropes shall not be considered part of the top of the regulated portion of a trawl net.

(3) *Mesh obstruction or constriction.* (i) A fishing vessel may not use any mesh configuration, mesh construction, or other means on or in the top of the net, as defined in paragraph (a)(2) of this section, that obstructs the meshes of the net in any manner, or otherwise causes the size of the meshes of the net while in use to diminish to a size smaller than the minimum established pursuant to paragraph (a)(1)(i) of this section.

(ii) No person on any vessel may possess or fish with a net capable of catching black sea bass in which the bars entering or exiting the knots twist around each other.

(4) *Stowage of nets.* Otter trawl vessels subject to the minimum mesh-size requirement of paragraph (a)(1)(i) of this section may not have “available for immediate use” any net or any piece of net that does not meet the minimum mesh size requirement, or any net, or any piece of net, with mesh that is rigged in a manner that is inconsistent with the minimum mesh size requirement. A net that is stowed in conformance with one of the methods specified in § 648.23(b) and that can be shown not to have been in recent use, is considered to be not “available for immediate use.”

(5) *Roller gear.* Rollers used in roller rig or rock hopper trawl gear shall be no larger than 18 inches (45.7 cm) in diameter.
